

Knowledge is nothing if not shared

Simone Bianco

Competition based therapy for RNA virus infection

Thursday **November 19** at **17:00** online

SIAM Student Chapter Prague would like to invite you to an online lecture of **Dr Simone Bianco** on the evolution of RNA viruses (such as SARS, SARS-CoV-2, Influenza and Polio) and the need to rationally design antivirals.

ZOOM:

Meeting ID: 988 1535 1026

Passcode: 767106

Please connect at 16:55.

Simone Bianco is research staff member in the department of Industrial and Applied Genomics at the IBM Almaden Research Center, where he leads the cellular engineering lab. His main research interests are in theoretical evolutionary biology, especially the evolution of RNA viruses, and cellular engineering. He is a TED speaker with over 1M views, leader of one of 2018 IBM's 5-in-5, the 5 projects which will change the world in the next 5 years according to IBM, and a honorary visiting lecturer for the Society for Industrial and Applied Mathematics, for his standing in the field of dynamical systems and his commitment to education.
